California Horticulture

The Fruit Growers' Guide

In the interest of our patrons and for the enlightenment of beginners in horticultural pursuits, we have almost wholly rewritten our regular catalogue, adding to its usual full and complete descriptive list of trees and plants we are offering, cultural directions which cover every phase of planting and management of orchards, vineyards and home grounds, showing the most advanced method of soil preparation, planting, cultivating, irrigating, pruning, etc., which have yielded best results in California. The book consists of 120 pages, $7\frac{3}{4} \times 10\frac{3}{4}$, sumptuously illustrated with upwards of a hundred original half-tones, two-color plates, and a handsome cover showing olives and grapes in color. The book contains nearly 125,000 words of text, is printed on a high-grade coated book paper, and from a mechanical point of view must be considered a work of art. The entire cost has been about \$5,000.00 for the edition.

In view of these facts it stands to reason that it is in no sense an enumeration of nursery stock, but a veritable compendium of valuable suggestions and methods which have given best results in orchard and field, garden and vineyard, based on actual experience and observation covering a period of 25 years on the part of the writer.

PRICE 25C PER COPY, CARRIAGE PREPAID.

HERALD PRESS

A WORD TO FRIENDS AND PATRONS

In presenting to our patrons our price list for the season 1908-1909, we wish to thank them for past favors, and solicit a continuance of same. We shall endeavor to maintain our reputation for fair dealing, and to give our very best attention to all orders entrusted to us, so that the stock we send out shall reach our patrons in good condition and be satisfactory. Our facilities for shipping are as perfect as possible, and with our improved methods we are enabled to pack and forward orders at short notice.

At our local sales yard, 1225 J street, we will carry a fine line of ornamental plants to meet the demands of our customers who have found it inconvenient to visit our packing grounds.

The limited amount of space in our J street lots will not permit us to display our immense stock to advantage, and our patrons who are desirous of purchasing fruit as well as ornamental trees are strongly advised to visit our extensive grounds on the Southern Pacific Company's railroad reservation on H street, between Amador and Sacramento streets. In order to keep a full line of palms and decorative plants, we have erected a fine greenhouse 20 by 50 feet, and a large lath house, which will be under the charge of a thoroughly competent man. The packing grounds can be easily reached by taking the North Park car. Get off at Sacramento street and go two blocks west.

Our main office is located at 1225 J street, in very commodious quarters and immediately adjoining our former office building. From here we are in telephonic communication with all of our nurseries and departments. We invite correspondence. Our services are always at the disposal of our patrons should they desire any advice on anything pertaining to our line of work.

Our stock of trees for this season is exceptionally fine, both in fruit and ornamental departments; and we are confident that we can please all those who place their orders with us. It is a rule of this establishment to send out no tree or plant which we would hesitate to plant ourselves.

GUARANTEE OF GENUINENESS

Our trees are all budded or grafted as far as possible from bearing trees, and every care and precaution is exercised to have them true to name; still with all our caution mistakes are liable to be made, but we hold ourselves in readiness, on proper proof, to replace all trees and other stock that may prove untrue to label, free of charge, or refund the amount paid. It is mutually understood and agreed to between purchaser and ourselves, however, that our guarantee of genuineness shall, in no case, make us liable for any greater sum than that originally paid us for said trees, etc., that prove untrue.

TO INTENDING PURCHASERS

THINGS TO OBSERVE

1. All orders should be legibly written on a separate sheet of paper, and not mixed up with the body of the letter.

2. In ordering please state whether substitution will be permitted, as we feel at liberty when no instructions accompany the order to replace with other sorts as nearly similar as possible.

A few words of explanation of the foregoing is, in our opinion, advisable, for customers on some occasions have made very serious objections to our exercising this privilege when it was really our desire to serve them to the best of our ability.

It often happens that a variety of which we grow only a limited quantity is exhausted early in the season, and as it may be impossible to secure it from other nurseries, it is either necessary to cancel the order or substitute with another kind which is similar. In nearly all cases when we exercise our judgment we do not hesitate to say that we believe our customers will approve of our desire to please them.

3. Our packing and labeling are as perfect as possible, and we charge for the same only to cover the cost of material. All goods are delivered at the railway or express office free of charge.

4. State distinctly how you wish us to ship—by freight or express; also designate the route, otherwise we use our own discretion in forwarding.

5. After delivering to the carriers we cannot hold ourselves responsible for any loss or injury to trees or plants after they have been carefully packed and shipped; but we will do everything in our power, if any loss should occur, for the protection and recovery of our customer's property.

6. Orders to be sent by express, C. O. D., will be filled, provided one-half of the amount is sent with the order.

7. If any mistakes are made in filling orders, we will cheerfully rectify the same, but must respectfully request our customers to notify us at once, or, at the most, within ten days after receipt of the goods.

8. Orders from unknown correspondents must be accompanied by a remittance or satisfactory reference.

9. We uniformly tie our trees in bunches of 10, and grape vines in bundles of 50; and we suggest to our patrons to make their orders for assortments as far as possible in multiples of these numbers.

10. Articles mentioned in the following list will be furnished at prices named as follows: Five at the 10 rate; 50 at the 100 rate; 500 or more at the 1000 rate. Less than five of a variety at the single rate. This does not mean, as an illustration, that 10 pears, 10 apples, 10 plums, 10 nectarines would be charged at the 100 rate. To secure this rate it will be necessary to order 50 trees of one sort.

11. For the convenience of those who cannot be reached by railroad or express, packages of small trees, if in stock, not exceeding four pounds in weight, can be forwarded by mail, such articles to be charged at single rates, postage additional.

12. Please remember to write your name, postoffice, county and state as distinctly as possible; also give your nearest express office and railway station, or if on a stage route, send us special directions, giving us the name of the transportation company delivering the goods. Orders for export to old Mexico, the Hawaiian Islands, Cuba and South American points should give, in addition to the above, the steamship routes by which their orders are to be shipped.

All remittances should be by postoffice money order, registered letter, express order or bank draft. All orders from foreign countries to be accompanied by draft or international money order.

ABOUT WEIGHTS AND SHIPPING.

The question of freight charges to distant points is a matter of serious consideration to such customers, and we are therefore submitting a few figures to give a clearer insight into the subject.

The general run of deciduous fruit trees, either in bales or cases, average about as follows: 6 to 8 ft., 2 pounds each; 4 to 6 ft., 1½ pounds each; 3 to 4 ft., 1 pound each; 2 to 3 ft., one-half of a pound each. Grape vines, one-third of a pound each.

Deciduous ornamental trees from 6 to 8 ft. and up to 12 to 15 ft., 3 to 6 pounds each.

Potted plants in from 3 to 6 inch pots, packed in boxes, weigh from 4 to 12 pounds each.

Citrus trees, balled, packed in boxes, 40 pounds each, and with naked roots, 3 pounds each.

Palms, packed in boxes, with ball of earth, 2 to 3 ft. plants, 40 pounds, and gradually increasing to 110 pounds each on 5 to 6 ft. plants.

Grape cuttings 14 to 16 inches long, 80 pounds to the thousand cuttings, in either bales or boxes.

Eucalyptus, cypress, about 100 to the flat, 50 pounds per flat; hedge plants from 50 to 100 to the box, according to size, 50 pounds per flat.

APPROXIMATE PACKING CHARGES.

It is difficult to give these charges accurately, as they will vary more or less, according to the condition of the trees; however, the figures given are taken from our records of charges for the run of shipments for sizes specified: 6 to 8 ft. trees in bales, \$2.25 per 1000; 4 to 6 ft. trees, \$1.75 per 1000; 3 to 4 ft. trees, \$1.50 per 1000; 6 to 8 ft. trees completely boxed, \$5.00 per 1000; 4 to 6 ft. trees, \$3.00 per 1000; 3 to 4 ft. trees, \$2.50 per 1000.

Grape vines in bales, 50 cents per 1000 vines: in cases, completely boxed, \$2.00 per 1000 vines.

Deciduous ornamental trees, 6 to 8 ft. and up to 12 to 15 ft., in bales, from 30 to 40 cents per 100, and completely boxed, 50 cents to \$1.00 per 100.

Potted plants in from 3 to 6 inch pots, from 1 to 5 cents each.

Citrus trees, balled, packed in boxes, tops protected with burlap, 7½ cents per tree (boxes hold from 10 to 12 trees); in cases, completely boxed, 10 cents per tree; naked roots, packed in moss in boxes, tops burlaped, 1 cent per tree; completely boxed, 1½ cents per tree.

Palms, balled, in boxes, tops burlaped, from 5 to 20 cents per plant, according to size.

Grape cuttings packed in bales, 20 cents per 1000 cuttings, and in cases, completely boxed, 50 cents per 1000.

Eucalyptus, cypress and hedge plants, tops covered with burlap, in flats, 15 cents per flat.

As has been previously stated, the weights and packing charges given are merely a general average, and this data is supplied for the purpose of placing our customers in position to figure out about what their stock will cost them delivered at destination. We desire to assure our patrons that we only charge for packing to cover the cost of material used.

FREIGHT CLASSIFICATION.

It may not be generally understood that the method of packing a shipment of trees or plants is the basis on which freight charges are made. Nursery stock in bales or boxes completely covered with tule or burlap take the first-class rate, while in cases completely boxed the third-class rate applies. When trees are shipped without packing, the classification requires the payment of the double first-class rate.

In carload lots with a minimum of ten tons, class C applies, and this is as a rule from 50 to 75 per cent less than the first-class rate.

For local shipments in California, trees are either packed in bales, wrapped with tule, or in boxes, tops protected with burlap, for the difference between the first and third class rates is so slight that nothing would be gained by boxing, for the increased cost would more than offset the saving in freight charges.

To distant points in Texas, Mexico, Colorado and to other States and countries outside of California, when stock is to be a long time in transit, it is packed in paper lined cases, not only with a view of having the trees carry better, but also because of the saving in freight charges, the difference in classification being in many cases \$1.00 per 100 pounds.

We have made a very close study of traffic conditions, and our knowledge is used to secure in all cases the very lowest freight rates for the benefit of our customers.

No accurate data can be given as to freight charges on orders for export, except that in a general way a shipment by water to Australia or Japan from San Francisco will cost about one-third less than it does from Fresno to San Francisco, a distance of 206 miles.

CITRUS TREES—All of our stock is grown in Exeter, along the foothills, the great thermal belt of Tulare county, by the Roeding & Wood Nursery Company. The trees are planted in a heavy, black loam, permitting the taking up of balled stock in first-class shape. No fertilizer is used and in consequence of this our trees, when the planting season arrives, are sturdy, well matured—are, in fact, perfect specimens. The iron in the soil gives the foliage a deep, lustrous green, healthy color, and this in itself makes the stock attractive to dealer and planter alike. Quotations named are for trees taken up with ball of earth, or with naked roots. Diameter measurements are taken one inch above the bud. Trees are branched at two feet from the ground and have fine, compact heads.

ORANGE —Sour Seedlings..	12 to 15 in.	4.00	30.00
Sweet Seedlings.....	12 to 15 in.	3.00	25.00

GRAPE— It is only natural that Fresno, the greatest grape growing sec- tion in California, should have a nursery correspondingly large devoted to grape culture, in order to meet the requirements of customers from all parts of the Pacific Coast, and even far down into Mexico. Our trade in recent years					

GRAPES—It is only natural that Fresno, the greatest grape growing section in California, should have a nursery correspondingly large devoted to grape culture, in order to meet the requirements of customers from all parts of the Pacific Coast, and even far down into Mexico. Our trade in recent years has extended to some of the Eastern States, where the winters are not too severe. Our stock of vines on their own roots, Phylloxera Resistant roots and grafted on Phylloxera Resistant roots is very complete. Our vines are grown

in the Kings River bottom, on new land, in loose alluvial soil, causing them to have a fine, vigorous root system.

The vines will be supplied as follows: 500 at the 1000 rate, where this rate is quoted, in not less than 50 of any one variety; 50 at the 100 rate, in not less than 10 of a variety. In small lots of one or two of a kind, the 10 rate will apply, except in quantities of less than five vines, when the single rate will be charged.

Cuttings of all standard varieties of wine, raisin and table grapes are readily obtained. We are prepared to furnish cuttings in large quantities, providing parties place their orders with us prior to December 15.

ORNAMENTAL DEPARTMENT

SPECIMEN DECIDUOUS TREES

To meet the demand for large specimen trees we have placed them in a class by themselves. These trees are carefully selected and are as a rule well furnished with lateral branches. They are grown in a deep alluvial silty soil and are therefore well provided with fibrous roots, so that very little difficulty will be encountered in transplanting them if given ordinary care. Before shipping we cut the trees back to save freight charges.

	Inches in diam.	Height.	Each.	Per 10

EUCALYPTUS—All varieties planted in flats con-				
tain about 100 plants to the flat. As it is				
necessary to cut the flat in case a smaller				
quantity is ordered, part flats will be charged				
at 1½ cents per tree higher than the hundred				
rate.

PALMS

Of all the plants grown in California and in other states and countries with climates similar to ours, none are more decorative or do more to give a tropical effect to our gardens and rural homes than the palms. For the home the smaller and more tender varieties do much to set off the interior decorations. There is such an endless variety of these striking plants that sorts for the smallest garden which do not grow higher than four feet, to those which attain a height of 100 feet, may be selected.

As will be noticed from the following list, we carry a large stock of palms in boxes and tubs. These have been taken out of the open ground and are well established in their containers. They can be used either for porch decorations or planted out in the open ground. Such plants give an immediate effect and never go back when transplanted. We have a large stock of field grown Washingtonias that can be delivered, "bare roots," next April, and will make special quotations on large lots. Highly suited for avenue planting.

All marked with an asterisk (*) are for indoor and conservatory decoration.

OUR FIELD GROWN ROSES

Our roses are budded plants and field grown, in rich, loose, alluvial soil, which is conducive in giving them a fine, vigorous root system and heavy tops. Roses are tied in bundles of ten, and we will appreciate it if orders are made up as far as possible in multiples of this number. Plants will be supplied as follows: Fifty at the 100 rate, in not less than five of a variety. In small lots of one and two of a sort the ten rate will apply, except in quantities less than five plants, when the single rate will be charged. The roses are arranged in alphabetical order; the abbreviations opposite each variety indicate the class to which it belongs. Standard or tree roses, fine strong heads, will be supplied as follows: Five at the ten rate, fifty at the 100 rate, in assortments at option of purchaser.

ABBREVIATIONS.

Ban.—Banksia.	H. T.—Hybrid Tea.	Pr.—Prairie.
Ben.—Bengal.	Misc.—Miscellaneous.	Rug.—Rugosa.
Bour.—Bourbon.	M.—Moss.	T.—Tea.

- *Gen. Jacqueminot—H. P. Shining crimson.
- Gloire Lyonnaise—H. P. Salmon yellow.
- *Gold of Ophir—N. Coppery red.
- *Gruss an Teplitz—Bour. Dark crimson.
- *Helen Gould—H. P. Carmine.
- *Improved Rainbow—T. Pink striped crimson.
- *James Veitch—M. Velvety crimson.
- *Kaiserin Aug. Victoria—H. T. White.
- *La France—H. T. Clear pink.
- *Lamarque—N. White.
- *Louis Van Houtte—H. P. Rich crimson.
- *Luciole—T. Cherry red, golden yellow center.
- *Maman Cochet—Tea. Rosy pink.
- *Mabel Morrison—H. P. White and blush.
- *Mme. Alf. Carriere—H. N. White and yellow.
- *Mme. C. Testout—H. T. Clear pink.
- *Mme. de Watteville—T. Salmon white.
- Mlle Cecile Brunner—Poly. Salmon pink.
- *Marchioness of Londonderry—H. P. Ivory white.
- Marechal Niel—N. Sulphur yellow.
- *Marie Van Houtte—T. Canary yellow and rose.
- *Medea—T. Lemon yellow, canary yellow center.
- *Merveille de Lyon—H. P. Pure white.
- *Meteor—H. T. Deep crimson.
- *Mignonette—Poly. Pink.
- **Niphетос—T. Pure white.
- Papa Gontier—T. Brilliant carmine.
- *Paul Neyron—H. P. Deep rose.
- *Perle des Jardins—T. Bright straw color.
- **Persian Yellow—Misc. Deepest yellow.
- *Prince Camille de Rohan or La Rosier—H. P. Very dark crimson.
- *Reine Marie Henriette—H. T. Cherry red.
- Richmond—H. T. Deep scarlet.
- *Rubens—T. White and rose.
- *Snowflake—T. White.
- *Souvenir de la Malmaison—Bour. Flesh edged blush.
- Souvenir de Paul Neyron—T. Creamy white shaded rose.
- *Souvenir de President Carnot—H. T. Rosy flesh.
- *Sunset—T. Ruddy copper.
- *The Bride—T. Pure white.
- *Ulrich Brunner—H. P. Cherry red.
- *White Bath—M. Rosy blush.
- *White Maman Cochet—Tea. Pure white.
- *Xavier Olibo—H. P. Violet crimson.

Requisites for Nurserymen, Orchardists and Planters

Raffia, Labels, Tree Protectors, Twines, Knives, Shears, Spades, Sulphur Machines, Sheep Manure

RAFFIA

Red Star Brand—This raffia is of the very best quality and unequalled for use in budding. The strands are long, soft, pliable and strong; guaranteed first class. 1 pound at 15 cents per lb.; 10 pound lots at 12½ cents per lb.

TREE AND POT LABELS

	Per 1000
3½ inch Tree Labels, iron wire.....	\$1.00
3½ inch Tree Labels, copper wire.....	1.25
4 inch Pot Labels.....	.75
5 inch Pot Labels.....	1.00
6 inch Pot Labels.....	1.25

No printed labels furnished.

TREE PROTECTORS

Our extreme long, hot and dry summers make it imperative for all fruit growers to shade the bodies of young trees the first season. A piece of burlap or common newspaper wrapped around the tree will answer the purpose, but the most efficient and valuable of all protectors is made from the Yucca Palm. It is easily put on, will outlast any other protector, and allows the air to circulate around the stem of the tree. We have used these protectors for years, and can recommend them very highly. Soak the bundles in water shortly before using.

	Weight per 100
30 inches long, 7 inches wide, \$2.00 per 100; \$17.50 per 1000.....	20 lbs.
24 inches long, 7 inches wide, \$1.60 per 100; \$15.00 per 1000.....	18 lbs.
18 inches long, 7 inches wide, \$1.50 per 100; \$12.50 per 1000.....	13 lbs.
16 inches long, 7 inches wide, \$1.30 per 100; \$12.00 per 1000.....	12 lbs.
14 inches long, 7 inches wide, \$1.25 per 100; \$10.00 per 1000.....	10 lbs.
12 inches long, 7 inches wide, \$1.00 per 100; \$ 9.00 per 1000.....	9 lbs.
10 inches long, 7 inches wide, .90 per 100; \$. 8.00 per 1000.....	8 lbs.

GRAFTING WAX

½ pound 15 cents; 1 pound 25 cents.

GRAFTING THREAD

Grafting Thread put up in balls, three ply firmly twisted and loosely wound so that it can be soaked in boiling wax and used from the ball. Price per pound, not waxed.....\$0.35 Same waxed ready for use, price per pound\$0.50

To Keep Grafting Thread in Good Condition While Using

Put a ball of waxed grafting thread into a quart cup or pan (a tomato can will do), fill it half full of water and arrange over a lighted lamp or small oil stove to keep the water warm, go ahead.

Grafting Wax for Bench Use, and How to Wax Your Thread.

One part (by weight) Tallow; two parts (by weight) pure Beeswax; four parts (by weight) Resin. Put all in an open kettle and melt down. When boiling, throw in balls of thread loosely wound. When the balls sink to the bottom of kettle, the wax has gone through and they are ready to come out, when cool are ready for use. It will require two to four minutes for balls to sink.

KNIVES

FOLDING BUDDER

Ebony handle, brass lined with ivory tip, forged same as the finest razor, best on the market.

Price, each.....\$0.75

STATIONARY HANDLE BUDDER

Maple wood, fine quality steel.

Price, each.....\$0.25
Per dozen.....\$2.50

FOLDING PRUNER

Cocoa handle, steel lined; length handle 4 inches. Blade oil tested and tempered; suitable for heavy work.

Price, each.....\$0.90
Per dozen.....\$9.00

STATIONARY HANDLE PRUNER

Apple wood handle with extra long reinforced tang; good quality.

Price, each.....\$0.50
Per dozen.....\$5.00

STATIONARY HANDLE GRAFTING KNIFE

Maple wood handle, patterned after most approved style, fine quality steel.

Price, each.....\$0.40
Per dozen.....\$3.50

Stationary
Handle Budder

Folding
Budder

Folding Pruner

Stationary Handle Pruner

Stationary Handle Grafting Knife

ALL PURPOSE KNIFE

This knife is manufactured expressly for us. The handle is $3\frac{1}{2}$ inches long and contains pruning blade, budding blade and jack knife blade. It is made of the very best material and suitable for nursery and orchard work.

Price, each \$1.50

PRUNING SHEARS

PERFECT SHEAR

For making hard wood cuttings, such as grape, fig, etc., this shear in the hands of the average workman has given us the very best of satisfaction. It is strong and durable enough for ordinary work. It is patterned very much after the Rieser, having the double brass springs, which rarely break. It makes a clean cut and does not bruise the wood.

Price, per pair, $8\frac{1}{2}$ or 9 inch, postpaid..... \$ 2.00

Price, per dozen pairs, by express or freight..... \$20.00

Actual weight per pair, 1 pound.

FRESNO PRUNING SHEAR

This shear has come into universal use in Fresno and in many of the larger vineyard and orchard districts. For vine and tree pruning there is no more serviceable tool made.

The shear is made of the finest tempered steel, the jaws have a spread of $3\frac{1}{2}$ inches, permitting the cutting of branches which would ordinarily have to be cut with a saw. The handles are made of ash, and the sockets are strengthened with a steel band. Weight per pair, $2\frac{3}{4}$ pounds. Length, 26 inches.

Price, per pair..... \$2.50

RIESER CORCELLES PRUNING SHEAR

This standard shear from which all shears are patterned is made in Switzerland. It is hand made, and the material is the very best. It will outlast any other shear made two to one, in the hands of a careful work-

man, even where subjected to the heaviest work. We have used it in our nurseries for years for stubbing nursery stock, and have found it to be the only shear which would stand up to the work. Actual weight $1\frac{1}{4}$ pounds.

Price, per pair, $8\frac{1}{2}$ or 9 inch..... \$4.00

ROSE SHEAR

This shear is only adapted for light pruning and for cutting flowers. It is just the thing for ladies' use. It has a spiral spring and is nickel plated.

Actual weight per pair, $\frac{1}{4}$ pound.

Price, per pair, 6 inches long..... \$1.25

NURSERY SPADE

Oliver Ames & Sons make, D handle with double steel straps full length of handle, made expressly for heavy nursery work.
Size blade $12\frac{3}{4} \times 7\frac{1}{2}$, price, each..... \$2.25

THE VERMOREL "TORPILLE" KNAPSACK SULPHURING MACHINE

Without doubt this is the most effective machine manufactured. It has a carrying capacity of from fifteen to twenty-five pounds; it distributes the weight on the shoulders and the back, leaving the hands of the man operating it free to work the pump and open up the vines.

It is quite necessary to see the machine at work to realize its value. The sulphur, violently projected by a powerful bellows, sends out of the paddle-shaped nozzle, which can be directed at will, a mist so fine that it reaches every portion of the foliage.

In operating note that at the bottom of the machine and below the lever there is a slide used in increasing or decreasing the quantity of sulphur used. The head of the slide is on the outside; to pull it out increases the supply.

When not in use be careful not to leave any sulphur in the machine, and see that the brush and grate are clean.

If by chance the brush should become clogged, rub the three rows of hair with a piece of wire or iron.

If the hair on the brush should become partially worn out and not work evenly on the grate, unscrew the brassscrews at each end of the brush below the axle, take out the brushthrough the filling hole, slide the three supporters of the hair down, insertand fasten the screws again, being careful that the hair rubs the grate.

The machine weighs eleven pounds, and is usually shipped in closed case, bringing the shipping weight to eighteen pounds.
Price, packed..... \$17.50

SHEEP MANURE

Buck Brand—This is pure natural manure hauled from large deposits in the sheep camps. It contains no weed seeds and is thoroughly crushed and ready for use. It is highly suited for fertilizing vineyards, orchards, gardens and lawns. One part sheep manure to six parts soil makes an excellent mixture for potted plants.
100 pound bag, double sacked..... \$0.75

OUR OWN PUBLICATIONS

In connection with our business we have found it expedient to publish booklets in addition to our annual catalogue and price list. The entire list is given in the order of their importance.

The Smyrna Fig at Home and Abroad—A treatise on practical fig culture, together with an account of the Wild or Caprifig and the establishment of the fig wasp. (*Blastophaga grossorum*) in America. Price 50c.

California Horticulture: The Fruit Growers Guide—By George C. Roeding. A compendium of methods and suggestions on soil preparation, planting, cultivating, irrigating and pruning, together with a list of plants for orchard and field, vineyard and garden. 120 pages, $7\frac{3}{4} \times 10\frac{3}{4}$ inches, beautifully illustrated in half tones and color plates. Price 25c.

New Products of the Trees—Tells all about the latest and most valuable of Burbank's introductions, which we are offering for sale for the first time. Beautifully illustrated in natural colors from life, and half-tone engravings, made direct from the fruit and plant and from photographs. Price 25 cents.

Spanish Catalogue—Describes the leading and most desirable varieties of fruit trees, grapevines, ornamental plants and roses, and is of special interest to our Mexican, Philippine and South American trade. Mailed on application.

Catalogue and Price List—It is so arranged that prices of our stock may be learned at a glance. It also contains complete index to all the stocks listed. Mailed on application.

BOOKS FOR HORTICULTURISTS

California Fruits and How to Grow Them—Fourth edition, revised and extended. A Manual of Methods which have yielded greatest success, with lists of varieties best adapted to the different sections of the State. By Edward J. Wickson. A. M. Size of page, $7\frac{1}{2} \times 10\frac{1}{2}$ inches, about 500 pages, bound in cloth and fully illustrated. Price, carriage prepaid, \$3.00 per copy.

Grape Growing and Wine Making in America—By Prof. G. Hussman. Revised edition. Garden and vineyard management from planting to harvesting, both in the East and the West, especially exhaustive on California grape growing; all about making wine. Price \$2.00 per copy.

The Horticulturist's Rule Book—By L. H. Bailey. A compendium of useful information for fruit growers, truck gardeners, florists and others. A mass of information is presented of incalculable value to the grower, all carefully indexed. Price \$1.00 per copy.

Gardening in California—A brief treatise on best methods of cultivating a flower garden. Illustrated. 172 pages. Price \$1.00.
